

## Systemwide Technology Initiatives Management (STIM)

### Minutes

Thursday, February 10, 2022

3:00 p.m. – 4:00 p.m.

Zoom:

<https://csuci.zoom.us/j/81100931689>

Present: Heather Cribbs, Keven Jeffrey, Christina Mune, Erik Beck, David Walker, Cyril Oberlander, Gabriel Gardner, Mike DeMars, Alicia Virtue

January meeting notes accepted without changes.

### STIM Conference:

Planning document:

<https://docs.google.com/document/d/1p8bN5Numtq6i5jMXIXUw0eBn-OQlxc-ejU-O-s9TUEw/edit>

We aren't doing a conference with Digital Repositories.

LibIT Virtual conference: Yes

- Hackathon model in concert with conference or separate. If Hackathon, software/platform needed.
- First week of August?
- Challenges of sufficient speakers; get call out soon.
- Develop program plan; themes of interest: Teaching Tech, Exploration Days, NFTs, Web3, AI, Leganto/Rapido, ORCID, Plotathon - Channel Island; give data to CS teams to present the data. Data visualization.
- Proposal voting like Code4Lib Keynotes?

Time: 2 days

August 4-5, 2022

Finding speakers that we want to invite...

- SUNYLA midwinter 2022? <https://sunyla.org/sunyla-midwinter-2022/>
- Online NW <https://onlinenorthwest.org/> Here is their call for proposal: <https://onlinenorthwest.org/call-for-proposals/>

Program Schedule, are we asking for 30min, 50min, lightning talks, etc.

Recording and host on ScholarWorks.

Zoom Host: Channel Island

Regular zoom meeting, not webinar style.

If Hyflex of interest: Cal Poly Humboldt

Deans should highly recommend and promote professional development.

*Other promotional opportunities*

July 25-28: Cal State Tech Connect Virtual Conference: <https://www.calstate.edu/impact-of-the-csu/technology/tech-connect>

Leverage CSU Tech Connect to advocate for interest in working with libraries.

## **1st draft Call for Proposal Development**

Heather Cribbs

We should think about programs.

### **Hackathon**

Erik Beck will organize the Hackathon component, within or part of a series of events.

Prize often at the end, announce winner at the LibIT conference.

Developer week with LibIT at the end.

Heather, David, Erik, and Kevin will be the Hackathon program team.

Start with the ball park figure? then get a few quotes. However, I think our campuses have some development servers, or we can ask for a host... AWS to support this.

Moderation: Discord, Slack channel, GitHub

Ask folks what platform for collaboration?

Funding options?

### **Professional Development around programming skills**

- Python

- How to make learning Python more relevant.

- Library Carpentries / [NNLM](#)
    - Giving people a relevant problem to solve would be a good way to engage
    - Interest in learning Python coming out of the ULMS Resource Management committee seems to be driven by a desire to automate some tasks in Alma.

### **Scholarly Communication: Schol Comm**

They are hoping someone leads this. The Research Office is hoping libraries take care of it, Adriana is loosely organizing it. Lyrasis is helpful. ORCID SSO implementation isn't great. The API is going to give you the affiliations. Sheila Rabun, MA, MLIS [Sheila.Rabun@lyrasis.org](mailto:Sheila.Rabun@lyrasis.org) <https://orcid.org/0000-0002-1196-6279> & Paolo P. Gujilde <https://orcid.org/0000-0002-9758-5740>

ORCID: maybe invite Lyrasis consultants to help with program.
