

## Shared instance

## Separate instances

## Shared instance

Pros:

- easier maintenance, upgrades
- journal listing page
- single login for managers
- shared integrations?

Cons:

- scaling issues?
- shared data backup
- difficult for custom domains
- sandbox cannot migrate to prod

## Separate instances

Cons:

- harder maintenance, upgrades
- no journal listing page
- separate logins per journal
- no shared integrations?

Cons:

- better scaling
- separate backup per journal
- easier for custom domains
- sandbox can migrate to prod

## Separate instances

Automated creation, upgrades

Develop one

Allow administrator role

Per-campus DOI and ORCID?

Cons:

- harder maintenance, upgrades
- no journal listing page
- separate logins per journal
- no shared integrations?

Cons:

- better scaling
- separate backup per journal
- easier for custom domains
- sandbox can migrate to prod
